

# Creating impact.

We are looking for a

## Program Manager Process Innovation Center (m/f/d)

 **Deutschlandsberg,  
Austria**

### Who we are

Electronic components are found in nearly all electrical and electronic devices. TDK is a leading manufacturer of these key products. For our TDK Electronics **Process Innovation Center**, we are looking for a Program Manager whose role is designed to manage all initiatives and services for TDK Electronics departments and locations.

### Your qualifications

- Excellent understanding of operations and state-of-the-art manufacturing processes based on several years of work experience
- Master's Degree in Mechanical Engineering, Electrical Engineering, Physics or similar
- High level of project management skills with proven ability to take initiative, structure and prioritize work
- Experience with Agile Management methods preferred
- Strong general problem-solving skills
- Leadership skills & the willingness to lead
- Ability to work closely with remote teams in a multi-country & multi-cultural environment
- Fluent in English; German is a strong plus

### Your future responsibilities

- Develop and implement initiatives to enhance the technological infrastructure and processes, focusing on production technologies, robotics and automation
- Support feasibility studies and pilot projects to test new process solutions and coordinate industrialization
- Create and monitor project plans, timelines and budgets
- Collaborate closely with all stakeholders, including internal teams, external partners and factories

### What we offer

Covered by collective bargaining agreements

Flexible working models

Career development & continuing education

Sports & healthcare offerings

Cafeteria

... and much more!

### Salary

From € 5,000 gross per month (14x) based on full-time (38.5h/week) with the willingness to overpay depending on qualifications and experience
