Process Engineer (f/m)

As a leading global supplier of wafer fabrication equipment and services to the semiconductor industry, Lam Research develops innovative solutions that help our customers build smaller, faster, and more power-efficient devices.

This success is the result of our employees' diverse technical and business expertise, which fuels close collaboration and ongoing innovation.

Join the Lam Research team, where you can write your own success story. Come help us solve our customers' toughest problems and be part of a company that plays a vital role in the future of electronics.

Lam Research - a company where successful people want to work

Location: Austria, 9500 Villach
Employee type: Full time
Contract: Permanent
Job ID: 107322

Job Description

- Responsible for performing professional process engineering research, development, and evaluation in support of the company's complex semiconductor capital equipment and systems
- Support customer technology managers in the planning, data collection, analysis, and reporting of customer demos to defend existing process applications.
- Conceive and plan projects involving definition and selection of new concepts and approaches in the processing or development of new processes
- Compile and evaluate test data to determine appropriate limits and variables for process specifications

Required Qualification

- Master or PhD degree in Chemical Engineering, Materials Science, Chemistry, or Physics
- Must have strong analytical and problem solving skills
- Ability to execute a variety of tasks and flexibility to travel to meet business requirements (<25% of time)
- Excellent oral and written communication skills in English
- Familiarity with working in a chemical laboratory is a benefit
- Experience in surface preparation and analytical techniques is desired but not required
- A genuine interest in advanced technology and an on-going desire to learn

Compensation:
This position is subject to the Austrian Collective Bargaining Agreement for Employees in the Metaltechnology Industries, occupation group F. The minimum annual salary for the position (m/f) is 38,997.56 EUR based on a full-time employment. A higher payment is negotiable depending on expertise and skills.
