

MED-EL is a leading manufacturer of innovative medical devices for the treatment of various types and degrees of hearing loss. Our unique portfolio of implantable hearing solutions benefits thousands of individuals in more than 100 countries worldwide. With headquarters in Innsbruck, Austria, MED-EL has over 2000 employees around the world. In support of our continuing growth, we currently have an open position with focus on:

R&D Engineer for Mechanical Implant Components (m/f)

[Apply online](#)

RD_EA12103
Innsbruck, Austria

Main Tasks

- Develop new manufacturing processes and methods for implantable components and support production transfer
- Develop new implantable components
- Schedule and execute verification and validation tests
- Cooperate with and coordinate external suppliers of components
- Create and maintain documents (specifications, test reports, experiment descriptions) within the quality management system

Requirements

- Higher technical degree (university/FH) in the fields mechanical engineering, medical engineering or equivalent qualification
- Special knowledge of materials science (corrosion/ageing of materials) and joining technologies (e.g. gluing, welding, pressing) is a plus
- First professional experience is a plus, preferably in R&D medical engineering
- Good verbal and written communication skills, spoken and written English
- Team player, self-reliant and structured approach

Salary will be determined based on professional experience; the formal minimum salary according to Collective Bargaining Agreement is EUR 37.559,20.

We offer a challenging opportunity in a multinational work environment with English as our company language. We look forward to receiving your application at jobs.medel.com
