Software Developer Scripting (m/f/x) - Focus Tools & Automation

Would you like to work for an international FinTech company and play an active role in shaping the future of payment? We are looking for support for our technical documentation team at our location in Graz (Austria). The team is responsible for the implementation of our globally used, multilingual software documentation - which is written in markup by our technical writers, already supported by various tools (format checks, style guide, ...). We want to automate the steps up to the finished HTML page as far as possible and therefore we are looking for a scripting expert.

Your Tasks
Do you have a keen interest in writing scripts for process automation and want to develop new modules for our Ruby toolchain? Furthermore, you will take on the following tasks:

- Independent developing of innovative solutions and participating in the selection of process automation tools for technical documentation (e.g. for automated translations) and software testing
- Possibility to take part in the design of our toolchain architecture - together with another developer you decide which tools / technologies are used
- Maintaining and improving of CI/CD pipelines like Travis CI, Github Actions, Gitlab CI
- Participating in the UX of our documentation
- Supporting our technical writers regarding technical questions and working with teams across the globe

Your profile
- Good scripting knowledge in Ruby or Python as well as several years of experience with Linux environments; experience with Node.JS and BASH scripts is an advantage
- Experience in automated testing (e.g. Postman, Selenium, Puppeteer), web development (e.g. HTML, CSS, Javascript) as well as with Docker and Git is an advantage
- Interest in Cloud Services, Server Administration and Infrastructure-as-a-Code (AWS, Terraform, Puppet)
- Good command of spoken and written English, skills in German are a plus
- Passion for scripting and interest in new systems and technologies
- Team player with a structured and independent working style and solution-oriented approach

What we offer
- Diverse tasks with scope for introducing your own ideas, solutions and experience and possibility to contribute to the future of the company
- Further professional and personal development in a successful company that is growing strongly
- An excellent working atmosphere in an international, young, and agile team
- Flexible work schedule with flextime account and 38.5-hour work week
- A workplace with very good accessibility and modern equipment (MacBook)
- Attractive additional benefits such as home office, food coupons, ticket for public transport, team events, free coffee and tea, and many more
- Attractive and competitive salary of EUR 2,518 gross/month. Depending on experience and qualifications, overpayment in line with the market is a matter of course for us.

Have we caught your attention? If so, we are happy to receive your application via our career portal. For any further questions, please do not hesitate to contact Ms. Elisabeth Lampl.
