**Test Development Engineer (m/f/d)**

As Test Development Engineer, you will be responsible for functional electrical test development of products with embedded components within the area of power electronics. We are looking for a young professional with an affinity for technological details, electrical metrology and the ability to manage small- to medium-scale development projects.

**Your responsibilities**

- Maintain and improve existing functional test processes with a focus on power electronics
- Analyze customer requirements and perform feasibility studies
- Optimize the internal product design: Design for Test (DfT)
- Train new test engineers, fellow engineers and/or technicians in the areas of test techniques, methods and strategies
- Work with vendors and suppliers of functional test and handling systems as well as test interface hardware and software to develop novel solutions

**Your profile**

- Master’s Degree in Electrical Engineering, Test Engineering or similiar
- Experience in test engineering is preferred
- Excellent presentation skills in technical topics
- Technical understanding of electronic systems with a focus on power electronics
- Ability to work in interdisciplinary teams
- Full English and German proficiency written and oral

**Our offer**

- Personal and professional growth opportunities in a multinational, dynamic growth company
- Chance to actively contribute to AT&S’s success and to create value
- Being at the global forefront of technological developments in the electronics industry

If you are looking for a new challenging task please send us your application and your detailed resume. It’s just a click to apply online and we are looking forward to it. Your HR Team!
