Full- and part-time possible

LOCATION
Salzburg, Austria

HOURS
Full- or part-time

SALARY
between € 2,800 and € 3,600 (x14)
based on full-time

WHO WE ARE
We are AMRAX and combine AI&VR to build the future.

ABOUT THE JOB
You reinforce our brand-new computer vision team, responsible for creating pioneering customer experiences. Your main responsibility is to design and optimize 3D scenes. You will be part of a larger system for the creation of high-fidelity 3D scenes and will collaborate with the team working on different product components. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality products is essential. You want to enjoy flexible working hours, a unique corporate culture with attractive benefits, and exciting training opportunities?

ABOUT YOU
You are interested in ...
- the development of a new technology process in the field of Virtual Reality
- delving deep into cutting edge methods for representation and interactivity
- high visual fidelity, best feasible performance and maintainability

You provide comprehensive knowledge of ...
- a background in information technology & computer graphics
- a strong understanding of processes for modeling, texturing, lighting and environment setup

You're experienced with ...
- Blender and/or Unity Engine
- C++ and/or Python
- HMDs, VR solutions, etc.
- code versioning tools, such as Git
- respect towards colleagues and clients
- high affinity to emerging technologies

You have ...
- a master or bachelor degree in computer graphics or equivalent education
