Technology Manager (m/f/d) – ID 3358

Graz

Every day, ANDRITZ continues to deliver successful innovative solutions to our customers globally. Why are we so successful? Because we are passionate and love what we do! We are at the forefront of future engineering technologies, with solutions that ensure the success of our clients in key industries that are shaping the future of the world we live in.

YOUR TASKS

- You belong to a team that evaluates and develops Stock Preparation and Recycled Fiber concepts for the Pulp & Paper industry.
- You will have a central role in the process of developing the best possible solutions to our customers all over the world.
- Your responsibility is to act as a central source of knowledge and expertise for certain assigned process areas. In these areas you will lead our R & D efforts and continuously monitor and evaluate market and customer needs to identify new areas of possible development.
- Overall responsibility for the process technology in customer projects, starting from the sales phase until the final acceptance of the delivery.
- Central point of contact for all technological matters.

YOUR PROFILE

- A University degree in a related field of science.
- Good understanding of fundamental mechanisms and theories of Stock Preparation and Recycled Fiber concepts.
- Relevant working experience of 3 years minimum in the pulp and paper industry, preferably in fiber treatment process areas.
- Proven track record of shown initiative and ownership of challenging tasks.
- Proactive, analytical and results driven working style.
- Excellent communications skills in English, other language skills are appreciated.
- Willingness to travel and work in a truly global business environment.
