For our location in Gratkorn/Austria we are looking for a

**Student Position: Javacard Development Engineer (m/f/d)**

NXP Semiconductors N.V. enables secure connections for a smarter world, advancing solutions that make lives easier, better, and safer. As the world leader in secure connectivity solutions for embedded applications, NXP is driving innovation in the automotive, industrial & IoT, mobile, and communication infrastructure markets. Built on more than 60 years of combined experience and expertise, the company has approximately 29,000 employees in more than 30 countries.

As part of our development team you will contribute to and support the development of new innovative products. You will work using newly released technology of the IoT world. Together with you we want to shape the future.

**Your Responsibilities:**

- Java prototyping and development
- Assisting the team in market research and preparation of data
- Automating the production environment
- Documentation and preparation of presentations

**Candidate Profile:**

- Ongoing studies in Software Development, Informatics, Information and Computer Sciences or similar
- Basic knowledge of programming languages, especially Java
- Basic knowledge of scripting languages and building scripts
- Creative and innovative working style
- Eagerness to learn
- Solid English skills (conversation and writing)
- Availability: 15-20 hrs./week

The minimum salary for this position is EUR 13.50- gross/hour (freelance contract). The possibility of flexible working hours is given.

We offer various kinds of student opportunities with different time periods. If you are interested to find out more, apply [online](#) or send an email to lisa.ziermann@nxp.com
