Roche Internship for Group Informatics (RiGI): Cloud Brokerage Analyst (9-12 months)

Switzerland, Aargau, Kaiseraugst

Who we are
The Roche Global Infrastructure and Services delivers informatics services that enable Roche to do now what patients need next. We aim to be a pillar of stability, as well as the most trusted business partner, delivering reliable IT services while looking at how technological innovation can help Roche make a difference.

Within this scope, the Business Intelligence & Intelligent Search group will run the Enterprise Cloud Analytics Service project in 2020. This project will deliver fast to set up and easy to scale cloud environments while delivering compliance, security and data governance by design.

The position
The Cloud Brokerage Analyst develops and implements integrated communication strategies for stakeholders, creating communication plans that align with business objectives while defining KPIs to monitor business impact of projects deliverables, such as:

- Define what ROI means for your business as function of hard cost savings versus increase in agility and delivery performance
- Tie cloud KPIs to customer KPIs
- Survey user satisfaction
- Evaluate speed of delivery versus control on process stability
- Determine the security and compliance metrics that measure risks
- Enforce KPIs to determine the success of your SLAs

Who you are
- **Master student** in the area of Communications/Change Management, Business Administration, Project Management, Strategic Planning or Organizational Development looking for a master thesis or you are max. of 12 months after graduation from one of the above degrees (start date of the internship and of the certificate is relevant)
- Must be able to develop communications plans and tactics in order to achieve business objectives
- Ability to work through, synthesize, and narrate complex issues or new initiatives with a sense of ownership, drive and urgency
- Ability to define, implement and analyze KPIs such as given above
- Keen to demonstrate organizational, analytical and problem-solving skills

This internship position is part of the Roche Internship Programme for Group Informatics (RiGI).

Roche embraces diversity and equal opportunity in a serious way. We are dedicated to building a team that represents a range of backgrounds, perspectives, and skills. The more inclusive we are, the better our work will be.

If you still have questions, then please check our FAQs and videos.

Roche is an equal opportunity employer.
