

# Software Test Engineer (m/f/d)

Join our team and be our next expert in automated testing or manual testing for Airport Gate Operations!

## About ADB SAFEGATE

Our international based GATE team is working for airports all around the globe to operate faster and safer turnarounds of aircrafts at the apron and gate. We are developing and installing software and systems for surveillance, automation and management of operational procedures. Our team in Graz is working on **SafeControl Apron Management System ("SAM")** which improves turnaround efficiency and uses integration and real-time intelligence to optimize apron.

For our office in **Graz, AUSTRIA**, we are looking for:

**Test Engineer**  
(m/f/d)

**Team:**  
R&D Gate

**Location:**  
Graz, Austria

## Roles and Responsibilities

Join our „crew“ and get onboard as Manual or Automated Test Engineer for Gate Operation and Safecontrol Apron Management Software (SAM):

- Testing of our software products in production and real time / delivery environment
- Validation of new software functionality and processes
- Determination of optimized operating conditions and performance limitations
- Development of test methods and systems
- Contributing to technical documentation such as acceptance testing, process and reports
- Estimating, scheduling, performing and coordinating assigned work
- Monitoring work for compliance to applicable requirements, accepted engineering practices and our standards
- Ensuring effective communication, coordination and feedback in assigned projects/activities to/from and between all other Business relations.

## Skills Required

- Educational background in Computer Science / Software Development or relevant working experience
- Working experience in similar projects in software testing
- Experience with manual testing of complex software and applications and / or automated testing frameworks (Cypress, Squish, or similar)
- Skills in TypeScript or Python
- Know-how in Quality Assurance methodology and tools
- Very good skills in English, German is an advantage
- Be our next "Crew member" if you are in favor of testing, validation and aviation software!

## ... more to know:

- You have a very driven, motivated, and high-energy attitude that allows working in an international environment
- Working with high sense for quality and in an agile environment is your passion
- You're looking for a great team spirit, home office possibilities and most interesting projects you've ever worked in!
- You are improvement driven, structured and proactive and „set the bar high“
- Being one team, we play to win together with you as being our new crew member.

## We offer you

A workplace that celebrates diversity, entrepreneurship and collaboration. We'll provide you the opportunity to learn and grow, and realize your potential, supporting some of the most exciting projects in aviation. Our comprehensive benefits are designed to support your wellbeing in every sense. Join our crew and be part of our journey!

Due to legal reasons in Austria, we are obliged to disclose the minimum salary according to the collective agreement for this position, which is min. KV ST1 EUR 3190,- gross per month. However, our attractive compensation package is based on market-oriented salaries and is therefore significantly above the stated minimum salary.
