HID Global powers the trusted identities of the world’s people, places and things. Every day millions of people in more than 100 countries use our products and services to securely access physical and digital places. Over 2 billion things that need to be identified, verified and tracked are connected through HID Global’s technology. We make it possible for people to transact safely, work productively and travel freely. We work with governments, universities, hospitals, financial institutions and some of the most innovative companies on the planet—helping them to create trusting and trusted physical and digital environments so that they and the people who use them can fulfill their potential. Headquartered in Austin, Texas, HID Global has over 4,000 employees worldwide and operates international offices that support more than 100 countries. HID Global® is an ASSA ABLOY Group brand. **Software Test Engineer – Internship (HID)**

(f/m/d)

We are a growing multinational technical security company based in Graz that offers its employees a fun work environment, flexibility, and career opportunity. We are currently looking for an intern - student for **paid 14-week internship** in our Software Development team to be part of our successful journey.

During your internship you will work with our Engineers and get the opportunity to learn from the highly qualified staff. We expect you to support our development engineers with all aspects of testing and quality control. As part of the team, you will contribute to work required to successfully release a product by focusing in functional tests development, reporting and investigating bugs, writing test documentation, executing pre-release testing, and measure performance in our lab. We expect you to share our agile values, be motivated, focused, take initiative, and remain eager to learn. You will work as part of a team and independently.

**Requirements:**

- Active student status
- Availability to work minimum 20h per week
- Very good English, both written and spoken - you will be working in a multinational environment

**Desired Skills & Experience:**

- Experience in Object-oriented programming (C# / .NET)
- Scripting languages (Python, others), Test automation (Jenkins preferably),
- Code reviews experience, give and receive technical feedback.

**Great to have:**

- ISTQB certification or other test certification (can be online acquired)
- Experience with Secure Elements, RFID, NFC, HCE or BLE technologies
- Working knowledge of cryptography and security practices
Responsibilities:

- Develop test cases and specify new test scenarios,
- Develop new test framework features, common libraries, code coverage tools
- Support in test execution and test results analysis
- Create project documentation and document performed tests

We offer:

- 14-week paid internship
- Opportunity to gain professional experience in a friendly international atmosphere
- Flexible working hours with the possibility to work from home
- Modern work place in “green” building
- Non-hierarchical environment
- Business travels
- Innovation days

You will work among smart people with lots of support, ramp-up help and great ideas.

Finally:

If you are creative, passionate to learn and explore, able to communicate fluently in English, if you are looking for new challenges and you search for a position that will move your career forward - then we are looking forward to meet you in person. Please contact us under details below.
