

Software Developer for Audio Network Firmware Open Position

Why we are looking for you?

You are an expert when it comes to Networked Embedded Software and you bring relevant experience with C and C++. Passion for professional audio and multiple years of experience in the industry make you the perfect candidate.

Networked applications are more than familiar to you. Even better if this comes along with experience in audio networking.

You are curious to apply network technology in the field of professional audio use cases.

You are looking for a job with meaning and you carry and shape the vision with us that networking is a trending topic.

You are committed to an open culture of discussion within the team and you are passionate about your work.

You will independently take responsibility for the entire firmware. Together with the founders and the test team you will define new features and improve the quality of the software.

You are an essential part in building our software development department.

You are the right person to accompany the market launch with us and to further develop the software in close cooperation with our pilot customers.

Software Developer for Audio Network Firmware - Open position

What we offer in return?

Employee participation

You will work closely with the founders and be involved in decision-making processes.

You will not be thrown in at the deep water - don't worry - because a thorough onboarding is important to us. You get time to familiarize yourself with our structure and the product.

You have the choice: Do you prefer to work in Innsbruck area, hybrid or completely remote? We are happy with your decision.

Through (start-up) events and trade fairs you will get to know new places and cities, stay up to date with the latest tech trends and have the opportunity to meet exciting personalities from all over the world.

We foster a strong learning culture and offer you the opportunity to use learning and information platforms during your working hours. We're not just talking about the advanced C++ course, but whatever interests you. You just commit to sharing your knowledge with the team.

And last but not least: We offer a nice work environment in the middle of the alps. We love it!

Now it's up to you

Send us your resume and tell us why we should invite you to lunch right away.

For legal reasons, we have to point out that according to collective agreement minimum salary of EUR 2,635.00 gross per month applies for full employment (entry level ST1), although the planned budget may well be higher and the actual salary will be determined on the basis of your qualifications and experience.
