Join Tecan! Join the market leader! Work in an international and dynamic environment, share our success!

Do you want to make a significant difference in how the world is looking tomorrow and contribute to the innovation of state-of-the-art, cutting-edge technology products?

And we need you to join our R&D team at Grödig, Salzburg as

**Head R&D (100%) (m/f/x)**

**What you will do**

In this strategic, important role you are responsible for the innovative, high-quality and disciplined development of technologies, products and services by leading a world-class R&D team with effective, efficient and compliant development processes.

**Responsibilities will include**

- Leading our R&D team with core competencies in the design and development of detection and imaging systems hardware, software and applications, with a strong focus on the life science research and clinical diagnostics industries
- Collaborative product and application development with networks of internal and external partners across multiple sites and countries
- Membership in Company R&D Leadership team and close collaboration with Global R&D and Business leads on R&D portfolio planning and management
- Close coordination with product management, purchasing, engineering, production, service, quality and regulatory affairs functions across Company sites

**What you bring along**

- Advanced degree in engineering, applied physics, computer science or equivalent
- Several years of professional experience in the design and development of complex laboratory instrumentation, preferably in the life sciences or diagnostics industries
- Functional management experience with multi-disciplinary teams of over 30 employees
8+ years of project management experience with multi-disciplinary projects involving multiple teams and locations

An innovative and entrepreneurial mindset, with a strong record of invention, publication, and thought leadership in your industry

Good knowledge of systems engineering and agile development processes, enthusiasm for innovations and topics of the future (eg IoT)

Excellent written and verbal communication skills, evidenced by presentations at major conferences and/or industry events

What you will get

- Comprehensive Compensation and Benefits package
- Progressive employment conditions
- Exciting career opportunities
- Wide range of training courses
- International and diverse environment (30+ different nationalities)
- Strong company culture with rich history

Look no further and apply now!
We are looking forward to receiving your application online. Please submit your resume (w/o picture and w/o cover letter, reference letters and diplomas are optional).
