

[AHT Cooling Systems](#), with headquarters in Rottenmann is one of the leading international companies in the field of commercial refrigeration for the food industry. We are offering a place to generate solutions to reduce food waste. **Currently we are looking for a Backend Developer in our Digital Business Solutions Department (m/f/d). In this role you will develop decentralized infrastructure and SDKs to support AHT Digital Solutions products in a global IoT environment.** Here you could find a start-up environment with the security of a large enterprise.

Backend Developer / Digital Business Solutions (m/f/d)

YOUR RESPONSIBILITIES

- As a backend engineer you will lead the design and development of decentralized infrastructure at scale using mainly JavaScript/TypeScript language targeting diverse cloud provider infrastructure
- You will be responsible for designing and developing core business logic which would deal with a vast amount of data flows
- Following test driven development principles, performing design and requirement review, you will work closely with data scientists, hardware engineers, customers and other developers to deliver the best possible user experience and scalability for all our products
- You will build and maintain self-contained services using mainly TypeScript backend infrastructure within the IoT space with strong focus on Service Monitoring Tools

YOUR QUALIFICATIONS

- You have strong programming skills in JavaScript/TypeScript
- 5+ years of practical experience in the field of software development is a must have
- You must have an excellent understanding of building highly scalable, robust and fault-tolerant services
- You have experience with designing and building scalable interfaces (RESTful APIs, OAS, JSON data models) as well as with building serverless compute services
- Distributed systems e.g. Kafka, MQTT, OAuth 2.0 have been in your focus in the past
- You are experienced with timeseries, SQL and NoSQL databases (e.g. PostgreSQL, InfluxDB, redis)
- You are able to work comfortably with Unix-like systems and DevOps (e.g. Docker, Jenkins, Kubernetes, Azure, AWS.)
- You are a self-starter, able to work independently with minimal supervision
- You are used to work in decentralized teams

NICE TO HAVE

- Well-developed understanding of self-sovereignty identity, user management access, data modeling, data flows, data capture
- Knowledge about data harmonization and decentralized semantic
- Excellent understanding of decentralized data management

YOUR BENEFITS

You will have a key role in a growth path of AHT & Daikin Refrigeration. Your expertise will be highly appreciated and you will have a lot of opportunities to shape and structure your area of responsibilities towards the future. You will receive optimal support during your onboarding, internal and external training opportunities and a strong team. Your main work location could be your Home Office, but also if you prefer that, our office space in Vienna (23. District). The compensation package includes a yearly target salary starting with € 55.000,00 up to € 70.000,00. The final salary package will be dependent on your experience.

We are looking forward to receiving your application!
