Graz University of Technology seeks:

**Full-Stack Software Developer (f/m/d)**

- At the Institute of Interactive Systems and Data Science
- 20-40 hours/week
- Initial fixed-term contract for 1.5 years with the option to extend

---

**YOUR RESPONSIBILITIES**

- Designing and implementing high-performance, scalable architectures
- Implementing and developing TU Graz research information services, including repository services
- Ensuring the integration of new solutions into the existing system architecture
- Maintaining code quality, integrity and ensuring responsiveness of applications
- Consulting on technical requirements for advanced digital research and publication services
- Sharing knowledge and best-practices through technical documentation

**YOUR PROFILE**

- Ongoing or completed studies in software engineering, computer science, telematics, electrical engineering, automation technology or similar
- 3+ years demonstrated experience developing and maintaining interactive, data-driven Web applications (using back-end programming languages such as Python or Java and frameworks Spring Boot or Quarkus, Flask or Django; front-end programming languages such as Javascript or Typescript and frameworks such as ReactJS, Vue or Angular Typescript)
- Experience with software development best practices and methodologies desirable (scrum, test driven development, version control and refactoring)
- Demonstrated ability to work both independently as well as collaboratively in teams and with users
- Experience working with and contributing to open source software projects of advantage
- Excellent written and verbal communication skills in English

---

**WE OFFER**

Accessibility to the latest technologies
Dynamic, creative and multi-disciplinary team
Informal and stimulating working atmosphere
Flexible working schedule
Opportunities for further development

Public transport subsidy
University’s sports program
Workplace Health Management
Shopping discounts
Award for being the most family-friendly enterprise

---
