

SECURE CONNECTIONS  
FOR A SMARTER WORLD

## For our location in **Gratkorn** we are looking for a **Junior Secure Software Developer (m/f/d)**

NXP Semiconductors N.V. (NASDAQ: NXPI) enables a smarter, safer and more sustainable world through innovation. As the world leader in secure connectivity solutions for embedded applications, NXP is pushing boundaries in the automotive, industrial & IoT, mobile, and communication infrastructure markets. Built on more than 60 years of combined experience and expertise, the company has approximately 31,000 employees in more than 30 countries and posted revenue of \$11.06 billion in 2021.

The NXP Connectivity and Security department is working on a secure NFC and eUICC platform. We are extending our JavaCard OS development team and are searching for a talented secure software developer to support us.

### Your Responsibilities:

- Collaboration on embedded software projects in the field of NFC, eUICC and security
- Participation in software design, code and test plans / needed test coverage
- Design and implementation of software / firmware running on smart card microcontrollers
- Contribution to effort estimation and project planning
- Documentation of architecture and modules
- Active contribution to an agile software development process
- Familiarity and comfortable working with international standards

### Your Profile:

- University degree Engineering, Computer Science or similar
- Programming skills on embedded microcontrollers (ARM or similar)
- Experience in Java and C/C++ programming
- Experience in software testing
- Interest in working in an international team

### Beneficial skills (nice to have):

- Knowledge of Java Card Architecture, SW Architecture Design for Smart Cards
- Knowledge of embedded UICC
- Standards like Global Platform, VISA, Mastercard, EMVco
- Security algorithms
