Let's achieve our goal together – If you are looking for a job where you can contribute actively, develop personally and professionally and make a lasting difference then this is the right place for you. As an international family business with a long-term perspective, we know that it is our 3700 employees that are the key to our success. Let's achieve our goal together: Making people smile.

I am looking forward to your application:
Alfred Maier, Telephone +423 235 3497
alfred.maier@ivoclar.com

At Ivoclar, we support dentists, dental technicians and dental hygienists both professionally and personally in fulfilling their passion and purpose: to ensure that people have the best possible oral health care and quality of life, today and in the future. We are inspired by the knowledge that together we are better.

Do you want to work together with us to make people smile? Then come and join our global team as:

Intern Software Process Management m/f/d
Location Schaan, Liechtenstein

Your responsibilities:

• Collaborate with cross-functional teams to identify and document software development processes and procedures.
• Analyze existing processes and identify areas for improvement, with a focus on enhancing efficiency and quality.
• Support the implementation of process improvement initiatives by developing and maintaining process documentation, templates, and guidelines.
• Work closely with software developers, quality assurance engineers, usability experts and project managers to facilitate the process and resolve any related issues.
• Assist in the collection and analysis of process metrics to track performance and identify opportunities for further improvement.
• Contribute to the development and delivery of training materials related to software process management.

Your qualifications:

• Currently pursuing a university degree in engineering, computer science, business administration or a related field
• Strong analytical and problem solving skills with a keen eye for detail
• Technical motivation and a genuine passion for the software development industry
• Basic understanding of software development methodologies and lifecycle processes
• First experience with process mapping, modeling, and documentation
• Great communication and interpersonal skills and the ability to work effectively in a team-oriented environment
• Proven ability to multitask, prioritize tasks and meet deadlines

Let's achieve our goal together
