Materials Center Leoben Forschung Gmbh (MCL) is an internationally active research institution specializing in materials research. The field of activity of MCL includes on the one hand the implementation of research and development projects along the whole product value chain (materials design, materials processing and materials use in innovative products) and on the other hand material-based services (laboratory, computational and advisory services).

To strengthen our team, we are looking for someone with the following area of responsibility or requirement profile:

**PhD Thesis**

**Design of rail-track components based on advanced manufacturing methods**

*Reference-n°.: MCL_150*

**FE-Modelling**

**Crossings – Advanced manufacturing – System design**

*These topics inspire you or you are already familiar with them? Then you are right the person we are looking for!*

**What do we need?**
- Academic degree (master equivalent) preferably physics, materials science or mathematics
- Knowledge in programming languages and interest and experience in finite-element-methods
- Scientific curiosity, team skills, self-initiative, organizational skills
- Good oral and written communication skills in English

**We are working worldwide in strong cooperation with well-known scientific- and company partners**

**Your tasks?**
- Organization of and taking part at measurement campaigns in railway tracks
- Finite-element-simulations of wheels passing through railway crossings based on existing models
- Automatization of models by programming
- Presentation of results at international conferences
- Writing of scientific articles for peer reviewed journals

**Our offer:**
A permanent employment, with a start from June 1st and a gross monthly salary of € 2.794,60.

Please send your complete application documents by post or email. We would be pleased to get to know you!
