Job description

The job of a software engineer is to execute the full lifecycle of software development. This includes developing well-designed architecture, testable and efficient code as well as specifications and documentation. We are looking for motivated students (f/m/div)* with the willingness to learn new things and work in a challenging environment.

In your new role you will:

- Work in an agile development team
- Learn from your colleagues through active knowledge sharing initiatives
- Support and maintain existing code bases
- Design and develop new software components based on user requirements
- Develop and execute unit, integration and system level tests
- Focus on automation of processes using state-of-the-art tools

Further informations:
Start: January 2020
Employment: Part-time

Profile

We are looking for passionate software developers who strive for quality and want to contribute to the success of automotive components through related software support. This includes tools to verify LiDAR, Radar and 3D-Imager chips and also tools to manage e.g. productive test limits. Ideally, you already have experience with C/C++ or Python.

This position is subject to the collective agreement for workers and employees in the electrical and electronics industry. The salary for this position is 1,885,— Euro gross p.m. (full-time basis) for Bachelor students and 2,210,— Euro gross p.m. (full-time basis) for Master students.

Please attach the following documents to your application:

- Motivation letter
- CV
- Copy of your Certificate of matriculation at a university
- Copy of your Transcript of records
- Copy of the highest completed educational certificate (Matura certificate for Bachelor students, Bachelor certificate for Master students)
