Software Engineer – iOS

Wikitude has an immediate opening for a Software Engineer (full time) who will work in the Wikitude engineering team and develop the core Wikitude augmented reality SDK. The position will have the added benefit of working with a young, dynamic and highly experienced team in the flexible environment of an emerging international company.

Responsibilities and tasks will include
- Design and implementation of features for the Wikitude SDK for iOS
- Maintain and update relevant iOS sample apps
- Contribute to Wikitude SDK core features (C++)
- Working on the next generation of augmented reality for mobile devices

Ideally you bring the following with you
- Applied and proven experience in developing software for iOS
- Covering fundamentals of the iOS operating system
- Excellent knowledge and experience with Objective-C
- Knowledge of the following is a plus
  - Developing augmented reality applications
  - OpenGL ES 2+ and Metal
  - Experience in C++
  - Experience in Swift

Applicants from the European Union are encouraged to apply! Starting salary is EURO 33.502 per year (gross), with the willingness to pay higher salary depending on qualifications and experience. Beside salary, Wikitude is offering an attractive compensation package including e.g. meal vouchers, training and public transportation ticket.

The Software Engineer position is based in Wikitude’s HQ office in Salzburg and for highly qualified candidates we also provide the possibility for remote work!
