Junior Machine Learning Researcher
min. 20 h/week (m/f/d)

Artificial Intelligence meets LifeScience – The Graz based Hightech-Startup Vertify is developing a Deep-Learning based software in the field of healthtech. Through the development of computer-aided detection, we make an innovative contribution to personalized vertigo clarification.

WHO WE ARE LOOKING FOR:
- Completed or ongoing studies in software development / computer sciences
- Basic knowledge of Machine Learning / Deep Learning is essential
- Experience with Python, Jupyter and Tensor Flow is an advantage
- Valid work permit for Austria

YOUR TASKS:
- Literature research on the topic eye-gaze estimation
- Work in Jupyter Notebooks to implement and test various model architectures
- Implement and test several reusable components
- Systematic evaluation and reporting of results

WHAT WE OFFER:
- Work in a dynamic team, passionate about using AI to improve healthcare
- Flexible working hours in a flat hierarchy
- Various team events, education and networking opportunities
- Career opportunities in a fast growing company
- Home-Office as long as relevant governmental measures are set against COVID-19
- Great office location at Science Park Graz; close to the University of Technology

Based on qualifications, we offer a gross salary of EUR 2,320.00 per month (based on 40 hours/week). Please send your CV including possible start date to office@vertifyapp.com
