

RDAI_12309

Software Test Engineer (m/f/d)

Research & Development

Innsbruck, Austria

Professionals
Fulltime 38,5h
Limited 31-Jan-2025t

[Apply Now](#)

Your Tasks

- Work closely with software engineers to deliver the product
- Identify, understand and fix the risks
- Advise on test architectures; build, analyze and maintain continuous integration testing systems
- Design and develop robust, scalable systems to monitor and analyze real-time production applications serving our users worldwide
- Inspect and document software modules and services

Your Profile

- Bachelor or Master in Systems Engineering, Computer Science or a related technical field or equivalent practical experience
- Comfortable in automation for new features testing, new designs behind those features, the code and the software itself using a risk-based mind set for structuring tests.
- Very good programming skills to test modules developed with .NET Core, C#, Flutter and similar; working knowledge of NoSQL databases and data-modeling techniques as well as REST and gRPC APIs
- General knowledge of recent research in neural networks and artificial intelligence would be a considerable advantage. Strong desire for exploring, evaluating, and understanding new technologies
- Interest in learning more about cloud-native software development
