

BACKEND DEVELOPER

Graz | full-time | all genders

We are looking for forward-thinking, impact-driven developers who want to shape the future of IoT, AI, and cloud-based solutions in an agile environment. At smaXtec, we develop a unique health management system for dairy cows, using smart algorithms and AI applications to revolutionize herd health and sustainability.

Your Role

- Design and develop Rest-APIs for smaXtec's frontend applications
- Work closely with frontend developers to align API design with UI/UX needs
- Build and maintain integrations with dairy industry partners to enable seamless data exchange and create interfaces to control barn automation systems
- Create and maintain internal tools to improve workflows across departments
- Maintain clear and comprehensive API documentation for both internal and external use

Your Profile

- Completed technical education (HTL, Telematics, Computer Science, or related fields) and at least 3 years of experience in backend/cloud development.
- Strong skills in Python, Flask or similar, SQLAlchemy, Celery, RESTful APIs, SQL, Git
- Familiarity with Kubernetes (Google Cloud), Docker, Redis, GraphQL is a plus
- Self-driven with a passion for implementing your ideas and solving problems from model to application

What We Offer

- High-impact work in an agile, international Scale-Up environment.
- Flexible working model – a modern office at TU Graz Inffeld Campus & remote work options.
- Attractive benefits: Public transport subsidy, Edenred, "Firmenradl", company fitness cards, and team events.
- Every year, you can attend a conference of your choice or take part in a training of similar scope – a great opportunity for professional growth!
- Transparent salary model (gross annual, full-time):
 - Advanced: from € 48.000 gross per year
 - Senior: from € 57.000 gross per year
