INTERNSHIP: IOS APP DEVELOPMENT

Create mobile apps that will revolutionize museums and festivals.

INTK is a young and ambitious studio based in Utrecht, specialized in developing digital strategies for cultural organizations.

Our mission is to change how people relate to culture. Forty years ago, very few people sported regularly. Today, many people dedicate several hours a week to sports. Inspired by the changes in the sports sector, we would like to bring a similar shift in the culture sector. Our goal is to encourage people that love culture to engage in cultural activities weekly. For example, we want to help people that love cinema to go to the movies every week.

We work with several museums, theaters, cinemas, castles, libraries, festivals, etc. Some of the cultural organizations we work with include, NEMO Science Museum, Stadsschouwburg Utrecht, Film Theater Hilversum, Loevestein Castle, Library Utrecht, Le Guess Who festival, etc.

What do we do?
We have created websites that show museum collections with more than 100 thousand artworks. We have created websites for theaters that present hundreds of performances per year. Check out some of our work:

Your Job
We are in the initial phase of developing two apps. The first app is a museum guided tour. It includes tours, routes by visitors, tickets, and the collection, all in one place. The other app works like a personal sports trainer but then for culture. Based on data mining and machine learning, the app creates a schedule that encourages to go to cultural activities weekly.
