

Technical Hardware Internship (M/F)

The Oberalp Group is a management driven family business - a house of brands that creates high quality technical mountaineering products. We have 6 own brands Salewa, Dynafit, Pomoca, Wild Country, Evolv and LaMunt. As an exclusive partner of other brands in the sports sector we offer our entire know how in communication, sales and image building. We are a team of 850 employees in 10 countries worldwide – a group of adventurers and dreamers, mountaineers, looking for their next peak.

We are looking for an intern who supports our Technical Hardware Team for 6 months. As a member of the team, you will be involved in assisting mainly the Quality Manager and the Product Development team in everyday responsibilities, providing a supporting role to help to reach deadlines and objectives.

The ultimate goal of the Development team is to develop and execute the most innovative, technically advanced products in order to meet company goals and to ensure Salewa, Dynafit and Wild Country quality standards. Your role will be to help the team in achieving these objectives.

Tasks & responsibilities

- Assist the Quality Manager in creating technical specifications
- Execute goods inward inspection
- Support the product testing in the lab by use of appropriate machinery
- Help to manage workloads/tasks to ensure timely completion
- Support in 2D drawings of components and finished products

Profile

- University student or degree in engineering or a similar field
- Previous internships in a similar field are considered a plus
- Understanding of technical drawings
- Good English and German skills, Italian is a plus
- Proficient knowledge of MS Office and CAD (Solidworks), knowledge of Adobe Illustrator is an advantage
- Passion for mountain sports

Workplace: Bolzano, IT
