

🚀 AI & Beyond Incubator - Software Engineering - Summer Internship (10 Weeks)

Start: Monday 28th June, 2027

Bitmovin is a global Series-C SaaS scale-up that provides award-winning video streaming technology to world-renowned brands including **Discovery+, BBC, Red Bull Media House, Hulu, fuboTV, and The New York Times**, to name just a few. Our solution suite consists of a Video Encoder, Player, and Analytics platform, enabling content owners to redefine the viewer experience through API-based workflow optimisation, fast turnaround, and scalability. Innovations include the first commercial HTML5 MPEG-DASH.
At **Bitmovin,** we value cognitive diversity and the huge part this plays in not only creating a global culture second to none, but in how this underpins our ability to create truly representative, Emmy Award-winning products. Diversity in all its forms is encouraged and celebrated at Bitmovin; everyone has a role to play in helping us shape the future of video.

Why us? Bitmovin wants to give top computer science and software engineering students from universities and technical schools like HTL valuable work experience and also support them in writing their diploma thesis during a paid internship. We are welcoming students from all backgrounds; however, it would be beneficial to have a passion for software engineering and knowledge of software development fundamentals.

Your Impact? Come and work on a range of cool projects, using state-of-the-art technology, that help shape products used by millions of customers worldwide and trusted by industry-leading players like DAZN and F1. You could get involved in:

- Utilizing AI in Video Streaming
- Analyzing Docker images for optimal size
- Creating a player debugging user interface
- Building a software-programmable Smart TV remote
- Testing new CPU architectures
  … and much more!

How to Apply? Via our careers page, submit your CV, school certificate (Zeugnis), and a short video telling us:

1. Your goals for this internship.
2. A time you hacked a system (non-computer) to your advantage.
3. The AI or video project you'd love to work on and why.

Video tips: Keep it 2-3 minutes. Be real and show your passion!
We recommend a minimum of two months to ensure a truly rewarding learning experience.

Ready to make an impact? Apply now via bitmovin.com/careers.
