

RDAL_12306

Research Software Engineer (m/f/d)

Research & Development

Innsbruck, Austria

[Apply Now](#)

Professionals
Fulltime 38,5h
Permanent

Your Tasks

- Pioneering prototypes and finalizing state-of-the-art reinforcement learning systems for production
- Taking the lead in crafting pivotal product features and charting our system's ongoing evolution
- Influencing our product's strategic direction by defining game-changing features, orchestrating system architecture, and endorsing industry best practices
- Applying expertise in cloud architectures and Web services to foster a reliable, high-performing platform
-

Your Profile

- Degree (Bachelor's, Master's, or PhD) in Computer Engineering, Statistics, Data Science, Electrical Engineering, or a related field
- Proficiency in one or more areas: reinforcement learning, machine learning, recommendation systems, pattern recognition, data mining, or artificial intelligence, with some focus on self-adjusting systems
- Advanced programming skills with hands-on experience in developing applications using object-oriented languages. Familiarity with design patterns, standard frameworks, and protocols is a plus
- Experience with Deep Learning techniques and language processing challenges; practical-level knowledge with open-source ML toolkits such as PyTorch or TensorFlow
