The EMCC Lab is looking for research enthusiasts in the areas of

- Electromagnetics & wave propagation
- Antenna theory
- Electromagnetic compatibility and coexistence system engineering
- RF and microwave engineering incl. measurement
- HW and printed circuit board design
- Multi-physics and multi-level modelling (tools like CST, Ansys, COMSOL, MATLAB)

power your research.

Become part of Silicon Austria Labs (SAL) – the top research center for electronic based systems (EBS). Unfold the future, unfold yourself.

In the network of science and industry, the center offers research in four pioneering divisions:
Sensor Systems, RF Systems, Power Electronics and System Integration.
SAL – a great place to research.

EMCC Lab
for “first-time right” electromagnetic compatibility and coexistence
