KML VISION is a growing innovative IT company based in Graz, Austria. We offer our employees the opportunity to shape the future of digital image analysis in Life Sciences, powered by Artificial Intelligence and Deep Learning, delivered by state-of-the-art cloud computing technology via the IKOSA® platform.

Frontend Software Engineer (m/f)

To strengthen our core development team in Graz, we are looking for a highly-motivated frontend software engineer (m/f) with skills in creating an intuitive user interface with state-of-the-art web technologies. Your main tasks are focused on the user-facing part of our IKOSA PORTAL, the primary point of contact for our customers.

YOUR PROFILE

- Flexible team player in a dynamic environment with passion to create innovations.
- Ability to work independently and responsibly.
- Solid knowledge of Angular 8+, or similar frameworks and web application technologies, e.g. HTML5, CSS, JavaScript, TypeScript, Bootstrap, or similar.
- Knowledge of Git SCM, CI/CD, automated testing and integration with existing REST APIs.
- Willingness to contribute ideas and concepts to create a great user experience.

OUR OFFERS

- Full-time or part-time employment with remote work is possible.
- Start date: July/August 2020.
- Become part of a strong team in an interdisciplinary environment.
- Significantly contribute ideas to the product vision and development cycle.
- Flextime and a high degree of self-management.
- Work closely with our UI/UX designers and REST API backend developers.

WHY YOU SHOULD APPLY

- Contribute to the most intuitive user portal for the analysis of big image data.
- Extend your skills and work experience in a professional environment.
- Minimal annual gross salary according to the Austrian collective agreement 2020 for IT is EUR 33,488 for full-time employment (38.5 hours per week).
- Your actual salary depends on your experience and qualification.

ABOUT KML VISION
With a strong scientific background and network, KML VISION is a thriving company, focusing on delivering the newest advances in automated digital image analysis to the Life Science sector. We develop the IKOSA® online platform, where Deep Learning technology powers our streamlined, intuitive applications. Hence, our clients immediately benefit from the most recent breakthroughs in Artificial Intelligence right at their fingertips. We create value by automating tasks that previously could only be performed by humans.

- Our passion is to develop high quality image analysis applications for object classification, segmentation, object detection and provide it as a Software-as-a-Service, accessible to anyone. To achieve higher reproducibility as well as faster and more cost-efficient analysis, the IKOSA® platform enables our customers a high degree of automation in digital workflows.
- We believe that with our technology it is possible to remove tedious tasks from routine work involving digital imaging.

THE LOCATION
KML VISION is based in Graz, Austria. Graz is an awesome place to live in because it is a vivid city offering a great urban lifestyle, it is close to mountains for hiking and skiing, and you can reach the Mediterranean Sea within just 3 hours of driving. Its historic old town is great for taking strolls after work and having a drink in one of the many bars. Our offices are located in walking distance to the centre at Nikolaiplatz 4, 2nd floor, 8020 Graz.
