

Grow your Career with us

Do you like working with big international customers and different cultures? Do you want to stand for the whole design of a complex solution? Then this might be the right job for you!

Beyond Now is an international leading ecosystem orchestration and digital platform provider, powering organizations to launch new services at speed and grow revenue in an era of cloud, IoT, AI and 5G by utilizing our digital platform and SaaS BSS. We're building our team with the best people, and that's where you come in.

Solution Architect (m/f/x)

8141 Premstätten | Full-time | Immediate Start

What you'll be doing:

The Solution Architect is building the bridge between business and IT by ensuring that the software solution works in a consistent way, is technically coherent and meets the desired standards. The Solution Architect takes care of the end-to-end solution based on our Infonova Product. Therefore you'll ...

- get the overall responsibility for the solution, based on cloud technologies like AWS, GCP or MS Azure, aligned to the business processes, including functional and non-functional requirements
- analyse the customer business processes together with the client in scoping workshops, work out solutions as well as supporting the development team during the implementation
- have the overview about our digital platform architecture and interfaces, being the client's voice into our product
- prepare and maintain the solution outline (that include context diagram, process definitions and non-functional requirements, basic description how the customer's business is modelled and mapped to Infonova, etc.)
- validate project estimations and proposed client solutions
- support customer success manager in the sales activity for cross and upselling (e.g. offer effective strategic presentations to a target audience)
- define and maintain reference architectures and blueprints (e.g. migration, integration into ticketing systems, SSO, ..)
- actively share knowledge about projects and customer solutions in the community

What you bring to the role:

- You have a completed higher technical education (additional cloud certifications are beneficial)
- You bring along min. 1-3 years experience in software and/or solution architecture as well as knowledge of how to design modern micro-service and cloud-based applications but also classic robust monolithic application
- You understand the client business requirements and processes (telco knowledge is beneficial) and being able to map them into the context of our digital platform and the marketplace
- You think analytically, "out of the box" and solution orientated (understanding of the client *and* developer's domain)
- You have a conflict resolution and creativity to find simple solutions to complex issues
- You are a strong and authentic communicator (in English – German is beneficial) with presentation skills covering technical (IT) and business side
- You are interested in different cultures and willing to travel (potentially all over the world)
- You are an open-minded personality who stays tuned and gather information proactively
