

Senior Engineer Factory Automation (f/m/div)*

Job description

To ensure that all data is available in the correct systems, or the correct actions are triggered at specific points in the production line, we develop our own software internally and operate it on all frontend sites. To be able to continue to provide excellent support for our production in this rapidly growing environment, we are looking to expand our international team based in Villach.

In your new role you will:

- **prepare and implement new requirements and use cases** (requirement engineering)
- **test new versions and support the roll-out processes**
- expand the **system monitoring**
- work-off and **remedy identified faults**

In addition, you will have the opportunity to perform some of your tasks in your **home office** (Hybrid) and you can arrange your **working hours flexibly**.

Profile

You are best equipped for this task if you have:

- completed a HTL (higher technical educational institution), university or university of applied science in the **field of computer science, automation technology** or comparable
- **1 - 3 years of professional experience**
- routine in **requirements engineering**
- knowledge in **dealing with relational databases** (especially MS SQL /Oracle)
- experience in **software development in C#** especially with VisualStudio and Source Code
- mastered the **administration under Git**
- good language skills in **German** and **English**

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group F (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Strengthen a globally networked team in the area of **Factory Integration (FI)** with your knowhow. All activities in automation technology are bundled here. Solutions are created that are groundbreaking for the FI landscape within the Infineon Group. Become part of the team and apply now!

At **Infineon in Villach** you shape the technologies of tomorrow and work in an international environment with more than 3700 colleagues from over 65 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The **City of Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Living in Austria has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach itself benefits from its status as a "small town", offering everyday living at affordable prices in an outstanding setting.
