

## Be part of our team!

AT&S, a world leading high-tech PCB & IC substrates company, is building a brand new **Innovation center and connected mass volume production** at our **Headquarters in Leoben (AT)** in the picturesque Upper Styria. Focusing on substrate and packaging solutions for the semicon industry, we are looking for committed talents and professionals who want to contribute to the technological progress of our interconnected world and **be part of an exciting growth**. With plants in Austria, China, India, Korea, Malaysia and offices around the globe, we offer excellent career opportunities for creators, innovators and enablers with the will to make a difference. We are seeking an experienced candidate to fill the newly created position of

## Capacity Management Specialist (m/f/d)

In this interesting role, you will be responsible for implementing and supporting capacity related strategies to ensure that our production loading will fit to our capacity. You will further set defined targets for the production departments and implement appropriate methods to achieve and continuously ensure optimal material flow in the plant.

### Your Responsibilities

- Key User for the related systems in the Production Planning area
- Generate production data analysis and define actions with information insights by well-structured reports
- Implement and support capacity related strategies to enhance production performance and strive towards our efficient frontier
- Investigate capacity constraints with appropriate tools & methods and maintain its outcome in our master data
- Definition and implementation of a holistic execution strategy by consideration of different functions and methods (e.g. Operating Curve Management, Kingman's Equation, Conwip, Little's law, efficient frontier, Poisson distribution, Monte Carlo Simulation)
- Continuous Improvement of existing processes and planning process landscape and best practice sharing with other plants in AT&S
- Counterpart for other departments for requests in terms of capacity calculations, future outputs and capacity related questions
- Work, Support, influence and lead on future operations projects

### Your Profile

- Graduate degree (BSc, MSc, or Higher) in Industrial Engineering, Mathematics or IT
- Experience in Capacity Management is advantageous
- Eager and willing to learn new skills and implement future based applications
- Analytical skills and high attention to complex connections
- Data driven personality
- Enthusiastic about complex subjects and complex tasks
- Willingness to work in an international environment
- Solution oriented Mindset Team spirit and enthusiasm to work in a high performance organization
- Excellent communication skills in English and German

### Our Offer

- Personal and professional growth opportunities in a multinational, dynamic company
- Chance to actively contribute to AT&S' success and to create value
- A secure position with long-term career perspective in an internationally expanding environment
- Attractive and competitive compensation package
- Flexibility through state of the art technological equipment and the possibility of remote work (home office or shared office Graz)

If you are looking for a new challenging task please send us your application and your detailed resume. It's just a click to apply online and we are looking forward to it. Your HR Team!
