Wanted: Junior Fullstack Developer (m/w/d)
Full time or Part time employment

Are you looking for a job where you can work completely independently and
can follow your passion?

It's time for new, exciting challenges!

Software-as-a-Service can be used by anyone, we offer System-as-a-Service.
From the telemetry module to the communication infrastructure to the server backend, we provide all
parts of a functioning IoT solution to our customers as a service.
Many years of experience with various automation, visualization and digitization rojects distinguish us.

We are looking for ambitious, forward-thinking individuals who enjoy their work.
You actively shape our projects and can contribute your ideas and talents in all areas of responsibility.

We live a flat hierarchy and support each other in all areas of responsibility.
It's not just you who need to grow and develop, it's us, together as a team.

That's what makes you special:

- During your studies you have already gained experience with JavaScript, HTML, CSS and vue.js
- You have experience with at least one of the three frameworks: Go, PHP or SQL
- Show interest in cloud computing, industrial IoT and data science
- You are a team player, have a creative way of working, show initiative

That's what you can expect:

- An exciting, varied and responsible area of responsibility in a dynamic environment,
  space for design possibilities
- An appreciative corporate culture
- Casual and relaxed working atmosphere

Benefits:

- Modern workplaces
- Flexible organisation of working time
- A good Work Life Balance (Homeoffice)

The collective agreement minimum salary for the position as Junior Full-Stack Developer is € 2.500 gross
based on full-time employment, with a clear willingness to overpay depending on qualification.

Have we aroused your interest? Then send your documents to office@moncon.at
We look forward to receiving your application
