

Applied Materials, Inc. (<http://www.appliedmaterials.com/company/about>) is the global leader in providing innovative equipment, services and software to enable the manufacture of advanced semiconductor, flat panel display and solar photovoltaic products. Our technologies help make innovations like smartphones, flat screen TVs and solar panels more affordable and accessible to consumers and businesses around the world.

The Applied Global Services (AGS) business unit is focused on delivering services, products, and integrated solutions that aim to optimize equipment and fab performance, as well as to enhance productivity. This segment enables companies to create integrated systems for the entire semiconductor chip-manufacturing process, along with automation software and maintenance of existing equipment
