

Grow your Career with us

Are you an engineer with strong coding skills and an understanding of interpersonal relationships? If you are interested in both areas, join our dynamic global team! Beyond Now is a leading international provider of digital platforms and ecosystem orchestration. We help businesses thrive in the era of 5G, IoT, and AI by enabling them to launch new services and grow revenue at speed by utilizing our digital platform and SaaS BSS. We're building our team globally with the best people, and that's where you come in. For our **entity in Austria**, we are searching for a

Senior Software Engineer for customer projects (m/f/x)

Graz (AT) | hybrid | Full-time | Immediate Start

What you'll be doing:

Build solutions for our clients to benefit from our Digital Business Platform! You'll be the **lead developer** of one of our agile and hybrid engineering teams and work on exciting projects in our department for customised customer solutions within a complex SaaS BSS enterprise software. Within your main tasks you will...

- build **software components** that are robust, reliable, testable and easy for other developers to understand
- Define **software requirements** together with the Product Owner and lead a team to **implement** customer requirements in one of our modern tech stacks (Java, Spring Boot, Container, Kubernetes/TypeScript, Node.js, AWS Serverless).
- be a vocal contributor to our **software architecture**, as well as how we work (DevOps/CI/CD) and our technology strategy
- develop and implement **automated tests** using Cucumber, Playwright and JUnit
- improve and further develop **internal development processes** and tools used by our development teams
- be actively involved in all stages of **software delivery** (design - successful go-live).
- implement innovative **frontends** in Typescript using React
- continue developing software, while expanding your role to **team leadership and organisational enhancement**. Take responsibility for people and organisation to create a team culture of transparency, growth, inclusiveness and collaboration.

What you bring to the role:

- You graduated a third level **IT qualification** (FH, TU - in Software Engineering and Management, Software Design, Cloud Computing, Information and Computer Engineering or similar)
- You are a seasoned software engineer with at least 5 years of **experience in agile SW engineering**, and you are an expert in one technology (e.g. Java and the Spring Stack, practical knowledge of AWS and Kubernetes, Cloud provider)
- Your previous roles covered already first project/technical team **lead-tasks**, with a focus on continuous improvement.
- You desire to **build great software products** and a strong focus on **results** i.e. getting things done, including a high degree of initiative, reliability, determination and willingness to learn. This is rounded off by a positive “can-do” **attitude**.
- Your passion for and deep understanding of **current trends in software engineering** (Cloud Services, Serverless, Microservices, DevOps, Continuous Deployment, Cloud native technologies) is admirable.
- You take on **responsibility** and support / coach (and later) **lead** others
- Your **mindset** is collaborative with an independent and accurate approach and willingness to work in an agile team
- You are an inspiring **team player**, listen to others actively and follow up with constructive outcome-oriented ideas.
- You **communicate** fluently in English and German, clearly explaining complex topics to different audiences.

DEVELOPMENT

- **Personal Development:** We seek more than a senior developer—we're looking for a future team lead and software architect. Join impactful projects with a talented, self-organized team. If you love coding and have an honest interest in people, but are unsure about people management, you may discover hidden strengths with us and learn from experienced colleagues.
- **State of the art technologies:** Cloud, AWS, Serverless & Container based, Azure, continuous delivery, etc. We have been using agile methods for more than 15 years. Benefit from this experience and still retain our start-up mindset – while keeping the standards for the quality of software development high.
- **Way of working:** You'll work on international projects, collaborate with agile experts globally and expand your knowledge while dealing with an interesting complex platform and marketplace.
- **Joy:** Good cooperation and togetherness are essential elements of our company philosophy. You'll be warmly welcomed in an agile team consisting of highly skilled software enthusiasts in a dynamic work environment.
- **Compensation:** The minimum salary is EUR 65.800,- all in gross per month on a full-time basis. However, we offer a salary which *in line with the market, depending on your specific qualifications and professional experience*. Be “Beyond”, find out **more** about us and what's in it for you on our [website](#).
- **Apply online through the application tool** and upload your well-structured informative CV in English!
Please note that we cannot accept e-Mail applications, but we are happy to help if you have any questions.

We are looking forward
to your online application!
