Software Developer (m/f)
Industrial Communication
Graz, JobID: 281433

Together we are driving Austria forward. We electrify, automate and
digitalize: Our employees make real what matters.
Siemens offers an extensive portfolio of integrated hardware, software and technology based services throughout the world. We are improving flexibility and efficiency in production processes to speed up the time to market of new products – be it the automotive or aerospace industry, mechanical engineering, etc. As a software engineer you are offered interesting job perspectives and professional development in a dynamic corporate structure, where you can discover your personal potential. Join the Digital Factory division in Graz, where together we will create new solutions for the era of the industrial digitalization.

Your new role – challenging and future oriented
- Software development in C for embedded systems in industrial environments
- Analyze, Design, Implementation of new features in the field of industrial communication (e.g. PROFINET)
- Writing user documentation (Doxygen is used)
- Maintaining the existing code
- Optimization of processes and procedures
- Providing solutions that fulfill functional performance criteria

Your profile
- A degree in computer sciences or similar studies or equal multi-year working experience
- Advanced skills in C
- Strong skills in debugging, performance optimization and testing
- Good skills in C++ and C#
- Fluent in written and spoken German and English
- Good knowledge of MS Office (Word, Excel, Visio) preferable

What else should I know?
- The salary for this position according to the Austrian “Kollektivvertrag” is at least EUR 44,400,- per year.
- Depending on education and experience a higher salary is possible. The actual salary is agreed upon in an individual meeting. Siemens as a big corporation additionally offers further social benefits.
