We currently have an open position of a

FULL STACK JAVA SOFTWARE DEVELOPER WITH INTEREST IN DATA SCIENCE

(38.5 h/w) in Graz

Is technology your passion? Are you tired of routine and are looking for challenging and diverse tasks in multiple domains using a variety of technologies? Would you like to tackle new and exciting IT topics in a stimulating, research-oriented environment? If yes, we would like to meet you!

Your tasks:

- Developing applications for analyzing, processing and presenting textual data and metrics
- Designing and documenting high-performance, scalable architectures
- Implementing state-of-the art research results for our projects and products
- Further development of our internal development standards

Your qualifications:

- Ongoing or completed education with a focus on software development
- Several years of experience in Java backend development
- Several years of experience in web front-end development
- Spring Boot
- Angular
- Docker, Kubernetes

Interest in:

- Python
- Textmining / Textanalyse / Natural Language Processing
- Deep Learning and other Machine Learning methods

We offer:

- Innovative, challenging and diverse tasks in multiple domains and within various projects
- Access to the latest technologies
- Exciting opportunities for professional and personal development
- Excellent work-life balance (flexible working schedule)
- Dynamic, creative and multi-cultural team
- Informal and stimulating working atmosphere

Under our collective agreement, the minimum gross salary for this full-time (38.5 h/W) position is €2,979 per month (14 times a year), plus a performance bonus. Higher compensation is possible, depending on your qualifications and experience.

We are looking forward to your application at **career@know-center.at**
