MACHINE LEARNING ENGINEER
min. 25 h/week (m/f/d)

Artificial Intelligence meets LifeScience – The Graz based Hightech-Startup Vertify is developing a Deep-Learning based software in the field of healthtech. Through the development of computer-aided detection, we make an innovative contribution to personalized vertigo clarification.

WHO WE ARE LOOKING FOR:
• Completed studies in software development or other computer sciences
• At least 2 years experience in Deep Learning for Computer Vision
• Experience with Python, Jupyter, and TensorFlow is essential
• Experience with C++ and mediapipe is an advantage
• Enthusiasm for modern programming languages and technologies

YOUR TASKS:
• Design, implement, and test various model architectures
• Implement and test mediapipe components for mobile applications
• Implement and test reusable Python/TensorFlow components
• Systematic evaluation and reporting of experiment results

WHAT WE OFFER:
• Work in a dynamic team, passionate about using AI to improve healthcare
• Flexible working hours in a flat hierarchy
• Various team events, education and networking opportunities
• Career opportunities in a fast growing company
• Home office is possible

For the advertised position, an annual gross salary between EUR 44.000,00 and EUR 54.000,00 is considered on a full-time basis according to your qualification and experience. Please send your CV including possible start date to office@vertifymed.com
