

# DEVOPS ENGINEER FOR AI-SOLUTIONS

M/F/X | FULL TIME

Our dream candidate would have...

- A minimum of 3 years experience in software development
- Excellent Python skills, experience with modern web development (Angular), and interest in AI applications
- Backend and (web) frontend development skills
- Good understanding of industry practices concerning software architecture, protocols, databases, and frameworks
- Experience with developing and operating solutions in a cloud environment (AWS)
- Practical knowledge on proper source code management, test pipelines, and continuous deployment
- Teamplayer with proactive approach and high sensibility for quality

...but if you are able to get up to quickly speed in those areas,  
we are happy to support you in that.
