

DevOps/Cloud Engineer

Graz | full-time | all genders

We are looking for forward-thinking, impact-driven developers who want to shape the future of IoT, AI, and cloud-based solutions in an agile environment. At smaXtec, we develop a unique health management system for dairy cows, using smart algorithms and AI applications to revolutionize herd health and sustainability.

Your Role

- Develop and maintain our **cloud infrastructure** using Docker, Kubernetes, and Google Cloud.
- **Manage data processing, storage, and analysis** with PostgreSQL, MQTT, Kafka, Redis, and Firestore.
- **Connect IoT devices worldwide** using LoRa and Chirpstack.
- Enhance **system observability** with advanced metrics and alerts.
- Through your **strong team spirit**, you actively collaborate to create seamless, high-performance user experiences.

Your Profile

- **Completed technical education** (HTL, Telematics, Computer Science, or related fields) and at least 3 years of experience in DevOps/Cloud Engineering.
- Proficiency in **Google Cloud** (e.g. Kubernetes, Networking, Cloud SQL, Flux CD), **Docker** and **GitOps**.
- Bonus: Experience with Python, Go, LoRa, Helm, Datadog, and Kafka (Raft).
- **Strong problem-solving mindset** with the ability to take ownership and implement solutions independently.
- **Excellent technical understanding**, analytical thinking, and organizational skills.

What We Offer

- **High-impact work** in an agile, international Scale-Up environment.
- **Flexible working model** – a modern office at TU Graz Inffeld Campus & remote work options.
- **Attractive benefits:** Public transport subsidy, Edenred, "Firmenradl", company fitness cards, and team events.
- Every year, you can attend a **conference of your choice** or **take part in a training** of similar scope – a great opportunity for professional growth!
- **Transparent salary** model (gross annual, full-time):
 - Junior: from € 40.000 gross per year
 - Advanced: from € 48.000 gross per year
 - Senior: from € 57.000 gross per year
